Geological Survey of Canada, Current Research (Online) no. 2005-B3 - 2005

This report briefly describes the nature, extent, and age of marine deposits near the head of Wager Bay on the west side of Hudson Bay, Nunavut. The main focus is on determination of the marine limit, or the

highest elevation reached by the post-glacial sea. The elevation of the marine limit yields information about the extent of inundation by post-glacial seas, the amount of post-glacial crustal deformation, and the elevation below which the geochemical composition of glacial deposits may have been altered by marine processes or by mixing of glacial materials with marine sediments. Marine limit positions were determined by recording the elevations of: raised deltas that indicate where meltwater streams & overflow channels from glacial lakes fed in to high-level water bodies; ice-contact deltas; and trimlines where the uppermost limit of wave erosion of glacial deposits is prominent.

Embedded and Ubiquitous Computing - EUC 2005 - Laurence T. Yang 2005-11-24

Welcome to the proceedings of the 2005 IFIP International Conference on - bedded and Ubiquitous Computing (EUC 2005), which was held in Nagasaki, Japan, December 6-9, 2005. Embedded and ubiquitous computing is emerging rapidly as an exciting new paradigm to provide computing and communication services all the time, - erywhere. Its systems are now pervading every aspect of life to the point that they are hidden inside various appliances or can be worn unobtrusively as part of clothing and jewelry. This emergence is a natural outcome of research and technological advances in embedded systems, pervasive computing and c- munications, wireless networks, mobile computing, distributed computing and agent technologies, etc. Its tremendous impact on academics, industry, gove- ment, and daily life can be compared to that of electric motors over the past century, in fact it but promises to revolutionize life much more profoundly than elevators, electric motors or even personal computers. The EUC 2005 conference provided a forum for engineers and scientists in academia, industry, and government to address profound issues including te- nical challenges, safety, and social, legal, political, and economic issues, and to present and discuss their ideas, results, work in progress, and experience on all aspects of embedded and ubiquitous computing.

Guinea-Bissau: 2006 Article IV Consultation Review of Developments Under the 2005 Staff-Monitored Program and New Staff-Monitored Program for 2006 Staff Report; Public Information Notice on the Executive Board Discussion; and Statement by the Executive Director for Guinea-Bissau - International Monetary Fund 2006-08-21

Despite abundant natural resources and arable land, Guinea-Bissau is ranked at the lowest end of the UN human development index, mainly because of the civil war of 1998-99 and the ensuing prolonged political instability and serious governance deficiencies thereafter. Since mid-2004, Guinea-Bissau has made a major effort to address the political and economic problems of recent years. The fiscal balance improved, but cash flow problems persisted throughout 2005. Higher imports and strengthened tax and customs administration helped buoy tax revenue.
