Reproducible Research with R and RStudio - Christopher Gandrud 2020-02-21

Praise for previous editions: "Gandrud has written a great outline of how a fully reproducible research project should look from start to finish, with brief explanations of each tool that he uses along the way... Advanced undergraduate students in mathematics, statistics, and similar fields as well as students just beginning their graduate studies would benefit the most from reading this book. Many more experienced R users or second-year graduate students might find themselves thinking, 'I wish I'd read this book at the start of my studies, when I was first learning R!'...This book could be used as the main text for a class on reproducible research ..." (The American Statistician) Reproducible Research with R and R Studio, Third Edition brings together the skills and tools needed for doing and presenting computational research. Using straightforward examples, the book takes you through an entire reproducible research

workflow. This practical workflow enables you to gather and analyze data as well as dynamically present results in print and on the web.

Supplementary materials and example are available on the author's website. New to the Third Edition Updated package recommendations, examples, URLs, and removed technologies no longer in regular use. More advanced R Markdown (and less LaTeX) in discussions of markup languages and examples. Stronger focus on reproducible working directory tools. Updated discussion of cloud storage services and persistent reproducible material citation. Added discussion of Jupyter notebooks and reproducible practices in industry. Examples of data manipulation with Tidyverse tibbles (in addition to standard data frames) and `pivot_longer()` and `pivot_wider()` functions for pivoting data. Features Incorporates the most important advances that have been developed since the editions were published Describes a complete reproducible research workflow, from data gathering to the presentation of results Shows how to automatically generate tables and figures using R Includes instructions on formatting a presentation document via markup languages Discusses cloud storage and versioning services, particularly Github Explains how to use Unix-like shell programs for working with large research projects

The International Criminal Court at the Mercy of Powerful States - Res Schuerch 2017-07-25

This book aims to investigate whether, and if so, how, an institution designed to bring to justice perpetrators of the most heinous crimes can be regarded a tool of oppression in a (neo-)colonial sense. To do so, it re-invents the concept of neo-colonialism, which is traditionally associated more with economic or political implications, from an international criminal law perspective, combining historical, political and legal analyses. Allegations of neo-colonialism in relation to the International Criminal Court (ICC) became widespread after the Court had issued an arrest warrant against the Sudanese President Omar Al-Bashir in 2009. While the Court, since its entry into function in 2002, has been

confronted with criticism from various corners, the neo-colonialism controversy was sparked by African stakeholders. Unlike other contributions in this domain, thus, this book provides a Western perspective on an issue more often addressed from an African standpoint, with the intention of distinguishing itself from the more political and emotive and sometimes superficial arguments that exist within critical legal approaches towards the ICC. The subject matter will primarily be of interest to scholars of international criminal law or those operating at the intersection of law and politics/history, nationals of African states and from other parts of the world professionally interested and/or involved in international criminal law and justice and the ICC, and governmental and non-governmental organizations. Secondly, the book will also appeal and speak to critical legal scholars and those interested in historical legal analysis. Res Schuerch is a Swiss lawyer specialized in the field of International Criminal Law and the ICC. He previously worked as a researcher at the University of Amsterdam and as an academic assistant at the University of Zürich.

Res Burman's Poetry V3 - Res Burman 2023

The ruggedly beautiful ocean shoreline of Cornwall and the Penzance area have provided a backdrop that has inspired his poetic musings for many years and, more recently, another of his artistic hobbies, photography. His poems range in motif from the especially serious subject of the spiritual world all the way to a satirical sense of humour expressing thoughts about the absurdities of life. As I think of Robert Frost to be the "American Poet" whose poetry touches on ideas to which all humans can relate, so I think of Res as being the "English Poet" whose poems are wide ranging and express ideas to which all humans can relate. Res is truly the gentlemanly, pirate, Poet of Penzance.

Finality in Litigation - Jacob B. van de Velden 2017-04-15

Ensuring finality in litigation ('preclusion') is a challenge. Res judicata and abuse of process are technical doctrines - traps for the unwary. The same doctrines can also be effective tools to avoid unnecessary or vexing duplicative proceedings or to determine how a case may affect the same or a related claim or issue in a subsequent case. This practitioner's guide is a timely and comprehensive treatise on English law on the topic. It addresses the entire spectrum of preclusion issues arising in an English court: -the court functus officio - the finality of a judgment; -res judicata - merger of the cause of action, cause of action estoppel, and issue estoppel; -abuse of process - relitigation, Henderson v. Henderson and collateral attack abuse; and -preclusion by foreign judgments. In a manner accessible to foreign lawyers, this book further offers a treatise of Dutch law that is of the same breadth and depth. It addresses all preclusion issues that may crop up in a Dutch court. Moreover, the cross-border context is considered - how domestic judgments fare abroad, how preclusion operates in the Brussels and Lugano regime, levels of preclusion set by European due process, and more. A contribution to conflicts theory, this book finally suggests improvements to the process of preclusion between jurisdictions, by clarifying the distinction between 'recognition of' foreign judgments and 'preclusion by' foreign judgments and by opening up a new field of choice of preclusion law. A first class work which will be of considerable interest to practitioners and scholars.'
